19. Eric Yuan — Zoom

Education: B.S. (China University of Mining and Technology), M.S. (Stanford University – part of continuing education / studies historically noted).

Major contributions: Founded Zoom; scaled it into a ubiquitous video-conferencing platform, especially during remote-work transition.

Company (short): Zoom provides video conferencing and collaboration software for enterprises and consumers.

Estimated net worth (Sep 2025): Several billion (founder equity and long-term holdings).

20. Ryan Roslansky — LinkedIn (Microsoft)

Education: B.A. (Syracuse University).

Major contributions: Became LinkedIn CEO after Jeff Weiner; focused on professional networking growth, enterprise products, and integration with Microsoft services.

Company (short): LinkedIn is Microsoft's professional networking, jobs, and learning platform.

Estimated net worth (Sep 2025): Tens of millions.

Notes, caveats, and sources

Net worth figures in tech fluctuate daily with stock prices and equity vesting; the
estimates in this document are rounded ranges and were compiled from public sources
(Forbes, Bloomberg, company filings, and reputable press) as of Sep 24, 2025.

- Company descriptions are concise summaries and do not capture entire product portfolios.
- For private-company executives or executives with large private holdings, exact net worth is often not public and is presented as a range.

Document prepared on Sep 24, 2025 — compiled for educational/reference use. If you want this exported to a Google Doc, Word docx, or PDF, tell me which format and I'll create a downloadable file.
